Portfolio: www.albert-designer.com
Career Direction: Business & Systems Analysis
Availability: Full-time, 5 days/week

Personal Strengths

Background in interaction design and quick to learn new tools. Turns business needs into clear requirements and workflows, and works with product and engineering teams to test and improve solutions. Skilled in using advanced AI tools to speed up analysis, documentation and prototyping.

Education

The Hong Kong University of Science and Technology Aug 2026 - Jan 2028
MSc in Technology Leadership and Entrepreneurship
Coursework: Python; AI-Driven Decision Making for Entrepreneurs; Product Lifecycle Workshop.

China Jiliang University Sep 2022 - Jun 2026
Bachelor of Engineering in Industrial Design | Score: 90.22/100
Coursework: User Research; Interaction Design; Product System Design.

Internship Experience

MCJ Design (Hong Kong) Jun 2026 - Present
Product Management Intern - AI & Digital Products
- Clarified user needs, business goals and MVP scope in PRDs for AI and health-device concepts.
- Aligned product and marketing teams on requirements and concept validation; translated audience and channel research into launch recommendations.

Westlake University - Research Lab Jan 2025 - Jun 2025
Interaction Design & Product Intern
- Mapped operator tasks to functional requirements and test plans; clarified interfaces with engineers.
- Validated workflows with lab users, improving the System Usability Scale score by 18 points.

Zhejiang University - Research Lab Jul 2024 - Jan 2025
UI/UX Design Intern - Digital Platforms
- Gathered requirements; produced workflows, Figma prototypes and specifications for an alarm-monitoring platform with product and front-end teams.
- Turned user tests into an improvement backlog and refined alarm priorities, reducing critical-alarm identification time by approximately 35% in task-based tests.

Hangzhou Asian Games Organising Committee Sep 2023 - Oct 2023
Design & Stakeholder Coordination Intern
- Clarified cross-team needs and priorities; delivered 50+ brand-compliant design sets to tight deadlines.

Projects

Mochi Island - macOS AI Companion Sep 2026 - Present
Requirements Analysis, Workflow Design & Prototyping (Team Project)
- Analysed four competing apps and developer interview feedback to define MVP scope, task workflows and notification priorities.
- Specified task states and response rules; integrated Python/Swift and web components, releasing macOS v1.0 in approximately 11 days.

VANTA - AI Vision Fish 2026
- Mapped operator tasks into AI vision and control workflows; specified inputs, outputs and alert feedback, and completed prototype testing.

Awards

MUSE Creative Awards 2025 - Gold; NY Product Design Awards 2025 - Silver; London Design Awards 2025 - Silver; Hong Kong Contemporary Design Awards 2024 - Bronze; G-Cross Award 2024 - Bronze; Jinjiang Cup - National Best Creativity; 19th Challenge Cup - Provincial Silver; 16th Lanqiao / Zhongshu Cup AIGC - National Third Prize.

Skills

BA methods: Design thinking; requirements analysis; process mapping; specifications; test-data analysis.
Tools & AI: Excel (pivot tables); Python (programming, basic algorithms); Figma/Axure; Cursor/Codex.
Languages: English (fluent); Cantonese (fluent); Mandarin (native).
