Albert (Haowei) Qiu

+852 6759 9932 | albertqiu17@gmail.com
Portfolio: www.albert-designer.com
Career Direction: Digital Solutions Engineering
Availability: Full-time, 5 days/week

Personal Strengths

Connects interaction design, product definition and engineering. Builds Python/Swift and web prototypes from user tasks, integrates device feedback, and validates solutions through testing.

Education

The Hong Kong University of Science and Technology Aug 2026 - Jan 2028
MSc in Technology Leadership and Entrepreneurship
Coursework: Python; Product Development & Prototyping; AI Technology Innovation.

China Jiliang University Sep 2022 - Jun 2026
Bachelor of Engineering in Industrial Design | Score: 90.22/100
Coursework: Smart Product Design; Product System Design; Interaction Design.

Internship Experience

MCJ Design (Hong Kong) Jun 2026 - Present
Product Management Intern - AI & Digital Products
- Prepared solution briefs and PRDs for AI and health-device concepts, defining functional scope and supporting technical proposals and cross-team validation.

Westlake University - Research Lab Jan 2025 - Jun 2025
Interaction Design & Product Intern
- Aligned interfaces and sensor/actuator requirements with embedded engineers, translating operating tasks into prototype test plans.
- Validated workflows with lab users, improving the System Usability Scale score by 18 points.

Zhejiang University - Research Lab Jul 2024 - Jan 2025
UI/UX Design Intern - Digital Platforms
- Defined alarm priorities, interface requirements and Figma specifications for a power-plant monitoring platform with product and front-end teams.
- Analysed task-based user-test data to refine the interface, reducing critical-alarm identification time by approximately 35%.

Hangzhou Asian Games Organising Committee Sep 2023 - Oct 2023
Design & Stakeholder Coordination Intern
- Coordinated on-site requests to deliver 50+ brand-compliant design sets under peak Games deadlines.

Projects

Mochi Island - macOS AI Companion Sep 2026 - Present
AI Product Development & Software Integration (Team Project)
- Integrated a Swift overlay, web UI and local Python engine; released macOS v1.0 in approximately 11 days using AI-assisted development.
- Mapped Cursor/Codex events to thinking, waiting, completed and failed states, making local agent activity visible to users.

VANTA - AI Vision Fish 2026
- Built a Web Serial interface for ESP32 control, live orientation feedback and collision alerts.
- Defined the AI vision input-to-feedback workflow and completed prototype testing.

Awards

MUSE Creative Awards 2025 - Gold; NY Product Design Awards 2025 - Silver; London Design Awards 2025 - Silver; Hong Kong Contemporary Design Awards 2024 - Bronze; G-Cross Award 2024 - Bronze; Jinjiang Cup - National Best Creativity; 19th Challenge Cup - Provincial Silver; 16th Lanqiao / Zhongshu Cup AIGC - National Third Prize.

Skills

Analysis & solutions: Design thinking; test-data analysis; Excel; solution briefs; Figma.
Software & tools: Python; Swift; HTML/CSS/JS; Ollama (local deployment); Cursor/Codex.
Languages: English (fluent); Cantonese (fluent); Mandarin (native).
